Education

Madan Mohan Malviya University Of Technology

Bachelor of Technology in ECE(IOT) 8.45/10

Sep. 2023 – July 2027

Gorakhpur, Uttarpradesh

Relevant Coursework

- Data Structures and Algorithm
- Internet Of Things
- Database Management
- Internet Technology
- Operating System
- Artificial Intelligence
- Computer Network

Experience

Indian Institute of Technology , IIT Jodhpur

May 2026 - July 2026

(Summer Research Intern)

- Developed and tested an Organic Electrochemical Transistor (OECT)-based biosensing platform for COVID-19 IgG antibody detection.
- Implemented sensor interfacing, signal acquisition, and real-time monitoring techniques.
- Reviewed and applied recent research in bioelectronics, semiconductor devices, and healthcare diagnostics.
- Analyzed experimental datasets and generated performance metrics for biosensor validation.

OverLoad Ware Labs AI (OWL Ai)

Feb 2026 - Feb 2026

(AI/ML Research Intern)

Remote

- Data Handling and Analysis of work, cleaning and normalisation .
- Conducted literature survey on adversarial transferability in computer networks and identified gaps in cross-model robustness evaluation.
- Co-authored a technical report on deep learning-based physical layer authentication.

Projects

Smart Dog Collar for Real time Health and Location Monitoring | *Tech Stacks:- IOT + MERN Stack* **May 2026**

- Developed an ESP32-based wearable device for real-time pet health monitoring and GPS tracking.
- Integrated MAX30102, MLX90614, and GPS modules for heart rate, SpO₂, temperature, and location sensing.
- Designed a MERN-stack dashboard for remote monitoring and analytics.
- Established cloud connectivity through Firebase for real-time data synchronization.
- Tech Used: ESP32, Firebase, MERN Stack, GPS, MAX30102

AI Based Student Performance Prediction | *Linear Regression, Data Preprocessing*

November 2025

- Predict the student Performance based on number of hours a student study .
- Student performance depends on multiple factors such as IQ, Attendance, Sleep Hours etc .
- Utilized the layout editor to create a UI for the application in order to allow different scenes to interact with each other.

Weather App | *Frontend + API*

December 2025

- Built a responsive weather application using React.js and OpenWeather API.
- Displays real-time temperature, humidity, wind speed, and 7-day forecast.
- Implemented API error handling and loading states and deployed on Vercel.

Technical Skills

Languages: C, C++, JAVASCRIPT, PYTHON, SQL

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js

Databases/Tools: MongoDB, Firebase, Git, GitHub, Postman

ML Libraries : NumPy, Pandas, Matplotlib, Seaborn

Styling : Bootstrap, Tailwind CSS

Leadership / Extracurricular

Executive Member at ECEs

2023 – Present

MMMUT, GKP

- Runner Up in Blind Fold Coding Challenge(Inter College).
- Member, ECE Student Association — helped organize technical talks and workshops.
- Problem Solving including different platforms around 500(LeetCode, GFG, CodingNinjas, Codechef)
<https://codolio.com/profile/av.18>
- Volunteer at College Technical Fest; managed event registrations, scheduling, and crowd coordination for participants.
